## background

I have around 9 years of experience in web and graphics design. To create websites I use HTML, CSS, PHP, Javascript, and mySQL databases. I always write directly in code, opting against visual editors. Often, my sites are built on open source content management systems such as Drupal, Joomla, or Wordpress.

I am equally skilled in both front and back end design. I'm familiar with modern image processing techniques, design trends, and have programming experience. I've created custom blogs, comment systems, editable pages, user management systems, etc. I'm a quick learner, and love picking up new skills.

## recent awards

**Adobe Design Achievement Awards 2007:** Semi-Finalist in the print category, with piece *Postmodern Paradise*

## goals and objectives

I'm looking to obtain a position with a progressive company where I can fully utilize my knowledge and experience as a designer. Additionally, I'd like a position that will constantly sharpen my skills and expand my sphere of knowledge.
